

What went well?

What should we keep doing?
What should we celebrate?
Where did we make progress?

What went poorly?

Where did we have problems?
What was frustrating to us or others?
What held us back?

[Topic of the retrospective]

Agriculture is the backbone of India.

A Crop is a plant can be grown and harvested extensively for profit or subsistence.

Crop in agriculture ,a plant or plant product that can be grown and harvested extensively for profit or subsistence.

crop are plants grown by farmers.Agriculture plays a very important role in Indian economy.

Agriculture is the science & practice of growing crops by the cultivation of the land.

The crop (also the croup,the craw,the ingluvies,&the sublingual pouch) is a thin - walled,expanded portion of the alimentary tract,which is used for the storage of food before digestion.

cultivated plant such as Wheat,Grain ,Vegetables,and Fruit are considered crops.

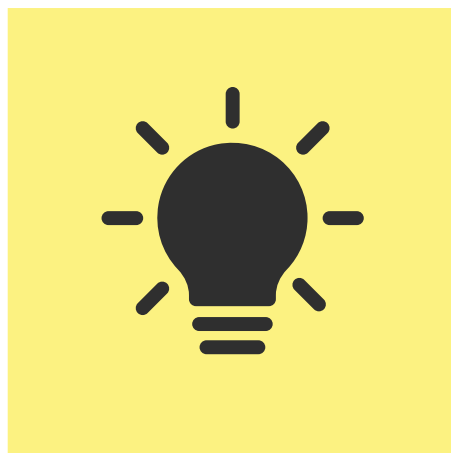

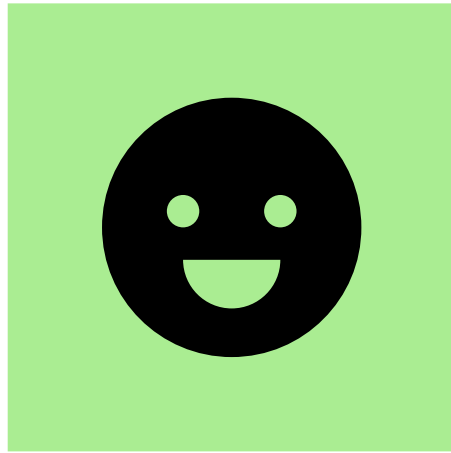

When plants of the same kind are grown and cultivated at one place on a large scale.

70% of the Indian population depends on agriculture for food & money.

Each year it produces a fine crop of fruit.This year's corn crop should be about 8% more than last year.

Crops are also classified on the basis of seasons .

The main crop is wheat & this is grown even on the very steep slopes.

Most parts of India have subsistence agriculture. Its main objective is the production of raw material of plant origin.

Limited knowledge & insufficient infrastructure.

Achieving high growth by raising production.

Insufficient use of fertilisers & other machines. Crop rotation selective breeding & a more production use of arable land.

Old technology & traditional implements used. Provides industrial raw material to a large number of industries.

Possess fertile plains & numerous perennial rivers.

Agriculture crop production helps in the economy of the country.

Critical to feeding the world's rapidly growing population.

Climate soil type irrigation technology & population density. Smart farming & resources while reducing crop losses.

India is a global agriculture powerhouse. Provides employment opportunity to the rural agriculture as well as non agriculture labourers.

Smart farming & efficient utilization of time & resources while reducing crop losses.

Inclusiveness by focussing on lagging regions, small farmers and women.

What ideas do you have?

What ideas do you have for future work together?
Where do you see opportunities to improve?
What has untapped potential?

How should we take action?

What do you believe we should do next?
What specific things should we change?
What should extend beyond this meeting?
